

LCA Design Studio

Vision

Global markets ecopositive competition, synergy & collaboration

Purpose

Business networks accelerating uptake of life cycle thinking (LCT) & Life Cycle Analysis (LCA).

Services

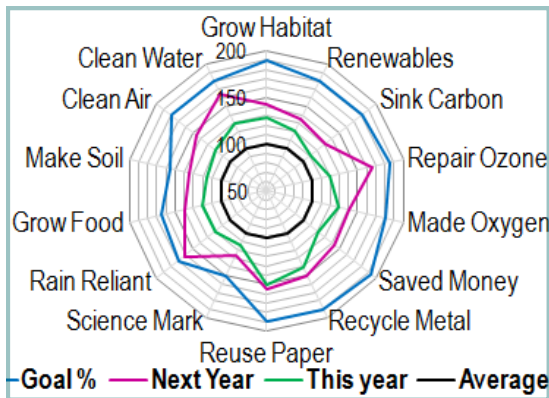

Training & tools enabling people to use this knowledge in business & product improvement. Troubleshooting, innovation, design, management, procurement & marketing tools for ecopositive outcomes.

LCT and LCA Consultants

Networks and support created for better adaptability. Advice informing design, business, research & career decisions.

Platform for

- Business, students, interns, practitioners, innovators & consumers LCT & LCA.
- Sharing inspiring stories of your new thought, speech, innovation and adaption;
- Synergising people, processes and products;
- Generating ecopositive opportunity, jobs & profit;
- Infusing LCT and LCA in projects and business.

Students: As we facilitate structured internships in basic system analysis, recognising ecopositives, LCT plus supply chain life cycle inventory modelling.

Interns: Can learn benefit analysis and impact assessment for balanced reporting. Students practice adopting standards, quality management methods, compiling LCA reports, Product Category Rules (PCR) and Environmental Product Declarations (EPD). They are connected to mentors and peers worldwide.

Consumers:

We provide tools to empower ethically preferable purchasing and enable persuasive communications as well as stakeholder engagement.

Fee Structures

Students, graduates and interns can use free access software and project libraries. Learning and database contents have set fees. New practitioner's use of specialist software is a set % share of project work. Practitioner fees are set at affordable hourly or weekly rates. Client projects range from \$220 to >\$220,000.

An inspiration hub for eco-positive advocates seeking LCA tools and sustainability projects

Practitioners:

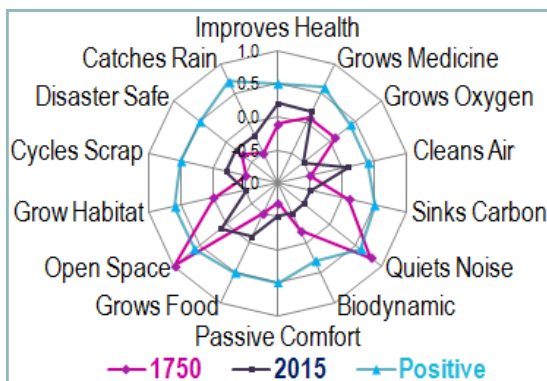

We offer expertise contributing to a rapidly developing eco-positive assessment field. We engage stakeholders and mentors to catalyse projects and establish LCA pathways. LCA advice covers systems, supply chains, market development, trouble shooting, process improvement, LCI modelling, ecolabelling, EPDs, LCA and 3rd party reviewer reports and PCRs.

Business & Project Teams:

Our support is designed to fit client needs. We assess and help you clarify your project and product eco-hot-spots and competitive advantages. Teams apply this knowledge for rapid improvement of organisation, economic, environmental and social profiles. We offer online coursework, webinars, face-to-face meetings at work, after hours at breakouts & retreats.

Research Institutions:

We enable project team's LCA tool access, practice and opportunity to review, create and audit quality data. With help you can create and disseminate accessible datasets for private and public use. We host and facilitate ideation retreats for innovation, writing and project breakthroughs across strategic planning, design, innovation, development and market delivery.

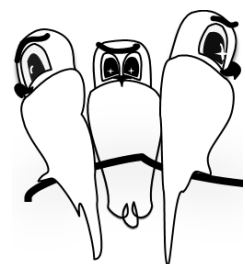

Educators:

We enhance student analytical capacity, systems thinking and practice outcomes. Institutions are enabled to establish and integrate sustainability curriculum in communications, IT, business, science, management, journalism, & marketing. Meaningful practice pedagogy, resource packs and assessment comes face-to-face or virtually.

Professional Associations:

We offer sustainability integrated across Continuing Professional Development (CPD) curriculum for engineering, architecture, management, industrial design, business & accounting etc. CPD modules enhance systems thinking and SWOT analysis for outcomes. We also provide constructive feedback on CPD and suggest improvements. Our CPD coursework enables professionals to seek best and improve worst practice in design, practice & development. These enable records and publishing of balanced sustainability assessment leading to improvement reporting, ecolabelling and EPD content.
